LEBHIR Walid

Computer Engineering Student

walidelbhir@gmail.com | 0704213771 | Kénitra, Morocco | Lebhir Walid | github.com/walidlebhir

Profile

Computer Engineering student focused on **Software Architecture**, **Backend**, **DevOps** and **Artificial Intelligence**, with an interest in designing scalable and robust systems. Looking for an **end-of-studies internship (PFE)** to apply my technical skills and contribute to innovative software projects.

Education

National School of Applied Sciences (ENSA) 09/2024
Engineering Cycle — Engineering Degree in Computer Engineering *Al-Hoceima*

National School of Applied Sciences (ENSA) 09/2022 – 07/2024
Preparatory Cycle *Al-Hoceima*

Sidi Aissa 09/2019 – 06/2022
International Baccalaureate in Physical Sciences *Kénitra*

Professional Experience

Software Engineer & AI
07/2026 – 09/2026
Highness *Montréal, Canada*

- Developed AI features for **Plana AI Studio**, an ecosystem of UI/UX design assistance tools that helps designers analyze, validate and make decisions on business features.
- Developed the AI backend with **Python** and **FastAPI**, integrated **LLMs**, ran tests and deployed on an **Ubuntu** instance in a test environment, with service management via **systemd**.

Software Engineer & DevOps
05/2026 – 07/2026
Nemo Technologies *Anfa, Casablanca, Morocco*

- Developed a reusable **Maven** library with **Spring Boot Auto-Configuration**, enabling dynamic integration and management of **Feature Flags**, with **PostgreSQL** for persistence and **JWT/RBAC** for access security.
- Designed a modular architecture with a **caching** mechanism to optimize performance, reduce data access and ensure simple, maintainable and scalable integration.

Software Engineer Intern
06/2025 – 09/2025
Proweb Media *Av. Patrice Lumumba, Rabat*

- Designed, developed and deployed to production a **Super Admin** module for **CodSpot SaaS**, enabling centralized administration of users, organizations, subscriptions and platform features.
- Built a modular full-stack architecture with **Laravel** and **React.js**, applying design best practices to ensure maintainability, scalability and performance.

Projects

Intelligent HR Platform – *RAG & Semantic Search*

- Designed and developed an intelligent HR platform based on a **RAG** pipeline, enabling queries over internal documents and semantic search across candidate profiles, using **FastAPI**, **LangChain**, **ChromaDB**, **Transformers**, **PyTorch** and the **Gemma** LLM via **Ollama**, complemented by a **SQLAlchemy/PostgreSQL** backend and a **Next.js/TypeScript** interface.

SpendPilot – *SaaS Expense Management Ecosystem*

- Designed and developed a multi-role SaaS platform for managing missions, expense reports, approvals and reimbursements with **NestJS/TypeScript** (Backend), **React** (Web) and **React Native/Expo** (Mobile). Integrated a multi-agent AI system via **MCP** (Node.js), **FastAPI**, **LangChain** and **LangGraph**, with **Docker** containerization and **AWS** infrastructure provisioned with **Terraform** (IaC).

TaxiFlow – *Cloud Mobility Solution for Taxis*

- Architected and implemented a multi-tenant mobility SaaS platform built on **microservices** with **Spring Boot/Spring Cloud**, covering rides, GPS tracking, payments and notifications. Event-driven architecture with **Kafka**, **Redis GEO**, a **PostgreSQL** database per service and **JWT** security. **Docker**, **Kubernetes**, **GitHub Actions**, **AWS/Terraform** and observability with **Prometheus/Grafana**.

Skills

Languages: C++, Java, Python, C#, JavaScript, TypeScript, SQL, Shell Scripting
Frameworks & Libraries: Backend: Spring Boot & MVC, FastAPI, Django, NestJS, Express.js, ASP.NET | **Frontend:** React.js, Next.js, React Native (Expo) | **AI/ML:** PyTorch, Scikit-learn, LangChain, LangGraph, CrewAI, Agno, MCP
Data & Messaging: PostgreSQL, MongoDB, Redis, ChromaDB, Apache Kafka, RabbitMQ
Cloud & DevOps: Git, GitHub, Docker, Kubernetes (k8s), CI/CD, GitHub Actions, Ansible, Terraform (iac), AWS, Nginx
Other : REST API, GraphQL, gRPC, Microservices, RAG, Fine-tuning, Event-Driven Architecture

Languages

Arabic: Native **French:** Fluent **English:** Intermediate
